EDUCATION

Bachelor of Engineering - Software Engineering

Aug. 2022 – May 2027

Concordia University

Montreal, QC

- ConUHacks 2026 and 2025 participant
- Art Matters technician, technical support in North America's largest student art festival

EXPERIENCE

Full Stack Engineer

Jan. – Aug. 2026

Arklydian

Montreal, QC

- Built an AI content-generation pipeline using Claude and GPT-4o
- Engineered prompt and structured-output workflows to keep generated content on-brand and reliable for enterprise clients
- Integrated multi-platform publishing APIs (TikTok, Meta, LinkedIn) with automated scheduling and retries
- Leveraged cloud infrastructure including Google Cloud

Software Developer Intern

Aug. – Dec. 2024 & May – Aug. 2025

Employment and Social Development Canada

Ottawa, ON

- Returned for a second term (8 months total) after first-term placement
- Developed Java Spring Boot services for national programs (over 6.5 million users)
- Managed 25+ APIs using Microsoft Azure API Management, OpenAPI and Postman
- Built and automated CI/CD via Azure and OpenShift pipelines, with JUnit test coverage
- Collaborated in an Agile DevSecOps environment

Tree Planter

May – Aug. 2023

Summit Reforestation

Smithers, BC

- Planted 50,000+ trees

PROJECTS

Merge Conflict GitHub Action | *GitHub Actions, YAML, TypeScript*

Sep. 2025 – Jan. 2026

- Published my own open-source action to the GitHub marketplace
- Designed the action to detect if merging a pull request will result in merge conflicts
- Integrated my project using the GitHub ToolKit

E-paper Photo Display | *Python, Linux, Raspberry Pi*

Nov. 2023 – Sep. 2024

- Used the Google photos API to download photos from an album onto the Raspberry Pi
- Wrote python code to display the photos onto a Waveshare e-Paper module

Chess Engine | *Java*

Dec. 2023 – Nov. 2024

- Developed a Java chess engine capable of playing full matches against human opponents
- Implemented a minimax algorithm with optimized evaluation functions

TECHNICAL SKILLS
